

One semester exchange or one research exchange semester at Hochschule Heilbronn –
University of Applied Sciences
1 student for the Summer Semester, 2027

Semester period: March - August
Beginning of lecture period: mid-March

Summer Semester, 2026 for info and example:
Official duration: 1st March - 31st August
Beginning of lecture period: mid-March
Introduction programme for Incomings: 1,5 weeks before lectures begin
End of lecture period: end of June
Beginning of exam period: end of June
End of exam period: end of July
For a more detailed schedule of the current summer semester: <https://www.hs-heilbronn.de/de/semesterterminplan>

Nomination deadlines:
15th November for the following summer semester
You may send Janice the nominated student's name and email address before the nomination deadline so that they can proceed internally. This also gives the student more time to apply for a visa, etc.

Scholarship: monthly stipend of €900 for five months, plus a €1,735 travel allowance

*** Important note to student: Scholarship payments will start after you arrived in Germany and have opened a German bank account. No payments will be made to non-European bank accounts. Please ensure you have sufficient funds available to cover initial costs and expenses for the first 2–3 weeks in Germany, estimated at approximately €2,000–2,500 (student dormitory/housing deposit, healthcare/student insurance of around 125€/M, flight, etc.), prior to arrival.

Scope: Computer Science or Medical Informatics students

Blast call to School of Computer Sciences, USM

Factsheet: https://cdn.hs-heilbronn.de/936b5832aef97a65/f5ee7868b7d2/HHN_Standort-Factsheet_HN_EN_web.pdf

List for exchange courses offered in English: The student may choose either a study or research exchange semester. You can find our course offerings in the Faculty of Informatics

(TechCampus Heilbronn) here: <https://www.hs-heilbronn.de/en/international-course-offer>. Students are also welcome to take courses from other faculties, such as Engineering, as we are located at the same campus (TechCampus Heilbronn) or Bildungscampus Heilbronn

If the student prefers to complete a research exchange semester, it would be more suitable for a **Master's student**. Our Master in Software Engineering and Master in Applied Artificial intelligence is taught entirely in English.
